GEMA Schedule Grade I to II

Cycle I	Cycle II
30-Apr-16	24-Oct-16
30-Jun-16	30-Nov-16
25-Jul-16	24-Dec-16
31-Aug-16	31-Jan-17

1. There is no formal examination for Class Nursery to II. The testing can be done simultaneously while teaching through CCE.
2. Most of time the students will not be aware that they are being tested.
3. There will be 10 cycles of CCE.
4. Student should obtain at least 'C' grade. If a child gets 'D' grade in some competencies, the teacher should repeat the cycle.

Tips of good hygiene for students:

1. Teeth should be brushed twice a day. Once in the morning and another after last meal.
2. Your mouth is not completely cleaned until you have brushed the tongue.
3. Before coming to school take bath daily and before going to bed, take a bath also.
4. Students should wash their hands after using, before they eat and snack, after they handle animals, and whenever they seem dirty.
5. Ear wax actually plays an important role. It is a protective coating in the ear canal. If students make too much of it doctor can remove it for you or give you special technique to do it yourself at home. Swabbing inside ears raises the risk of complications like infection, irritation, or damaging the ear drum.
6. Soap should not be used for washing hair. Use doctor recommended shampoo only once a week. Apply natural hair oil as a conditioner on your hair.
7. Wash your towels once a week at least and avoid sharing towels with family members. Because this is a common way to spread skin bacteria that might lead to an infection.
8. Under garments should be washed and dried up properly. Wearing of wet clothes should be avoided.
9. Germs hide under nails, if you scratch your skin with dirty, long nails, you may develop an infection.
10. Keep your living room neat and clean.
11. Do not share your comb, tooth brush, towel, undergarments with other family members and friends.
